

# 2021 MIC Area TIP Project Application

Duluth-Superior Metropolitan Interstate Council

## I. Instructions

Welcome to the next round of federal Transportation Improvement Program (TIP) funding. This application is for bridge, rail, roadway and transit projects for funding in 2021. **Applications are due by Friday, January 13, 2017, 5:00 pm.**

### Eligibility:

Only jurisdictions within the Duluth-Superior Metropolitan Interstate Council's official planning area, including state agencies, counties, transit, regional rail authorities, tribal governments and cities with a population over 5,000 are eligible to apply. Cities and townships with a population under 5,000 may submit projects, but will need a sponsor by an eligible jurisdiction.

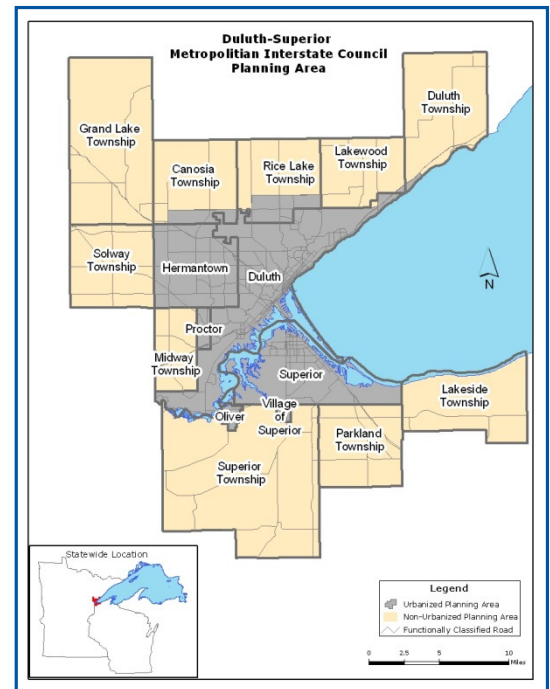

### Directions:

- Fill out all shaded areas and save it as a Word document
- Submit application via e-mail as an attachment
- Include supporting materials such as photos and maps as separate attachments
- No hard copies are necessary

### Evaluation Process:

MIC will evaluate each application for consistency with the regional goals, priorities, and project lists in the MIC's Long Range Transportation Plan. The MIC will also hold a public informational meeting to gather public input on each project.

All applications and supporting information will be presented to the Transportation Advisory Committee (TAC) meeting in February, where the projects will be individually scored, based on the scoring system approved by the MIC Policy Board in June 2002. The MIC Policy Board will review the applications and the TAC's recommended project rankings at its meeting the next evening. The Policy Board will then decide on the final priority ranking of the projects for submittal into the Northeast Minnesota ATP prioritization process. The ATP process encompasses the entire Arrowhead Region. (For more information see <http://www.nemnntp.org/>).

Submit applications by:  
**Friday, January 13, 2017  
5pm**

Via email to:

Any questions contact:  
Chris Belden  
(218) 529-7502

### Project Scoring Notes

- 6 Evaluation Criteria
  - Need & Benefit
  - Network Mobility
  - Planning Support
  - Multimodal Connectivity
  - Environment & Community Impact
  - Public Participation
- 100 points total
- Highest & lowest scores are eliminated.
- Roadway, transit & rail projects are prioritized separately.

### III. Project Overview - 2021 MIC Area TIP Project Application

|                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                       |

#### IV. Evaluation Criteria - 2018 MIC Area TIP Project Application

|                     |                                                                                                                                                                                                                                           |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Evaluation Criteria | <b>A. Need and Benefit</b>                                                                                                                                                                                                                |
|                     | Give detailed project description. Describe how it addresses the needs of the regional transportation system and consider the project's benefits relative to its cost. <i>(up to 3400 characters)</i>                                     |
|                     | The 5307 are transit monies that are annually used for operating, facility, and small capital items. Service levels can not be maintained without them. The FY2021 money will be used for facility rehabs, shelter replacements, and TSP. |

#### IV. Evaluation Criteria- 2018 MIC Area TIP Project Application, *continued*

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Evaluation Criteria | <b>B. Network Mobility</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|                     | Describe how the project will improve regional network mobility to provide a greater quality of service for the movement of people and freight. <i>(up to 3400 characters)</i>                                                                                                                                                                                                                                                                                                                    |
|                     | <p>Improving flow and safety (turn lanes, signal synchronization, transit/emergencypreemption)</p> <ul style="list-style-type: none"><li>• Reduce travel time and prevent congestion</li><li>• Enhancing the movement of freight, tourism and/or recreational travel</li><li>• Improving access between major activity centers in the region</li><li>• Increasing service capacity and reliability</li><li>• Promote multimodal options including transit, bike, pedestrian, train etc.</li></ul> |

#### IV. Evaluation Criteria- 2018 MIC Area TIP Project Application, *continued*

|                     |                                                                                                                                                                                                                                                                                      |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Evaluation Criteria | <b>C. Planning Support</b>                                                                                                                                                                                                                                                           |
|                     | Describe this project's planning support in (a) the Duluth-Superior Long Range Transportation Plan <i>Directions 2035</i> and (b) other related plans and studies. <i>(up to 3400 characters)</i>                                                                                    |
|                     | <p>Included in MIC's Long Range Transportation Plan</p> <ul style="list-style-type: none"><li>• Included or recommended in a MIC Plan</li><li>• Included in jurisdiction's comprehensive plan, capital improvement plan or other planning effort (consultant project etc.)</li></ul> |

#### IV. Evaluation Criteria- 2018 MIC Area TIP Project Application, *continued*

|                     |                                                                                                                                                                                                                     |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Evaluation Criteria | <b>D. Multimodal Connectivity</b>                                                                                                                                                                                   |
|                     | Describe how the proposed project accommodates multiple modes of travel (vehicular, bicycle, pedestrian, transit) and provides seamless connectivity within and between those modes. <i>(up to 3400 characters)</i> |
|                     | <ul style="list-style-type: none"><li>• Multimodal access</li><li>• Maintaining service</li><li>• Promoting transit</li><li>• Providing linkages</li><li>• Reducing vehicle miles traveled (VMT)</li></ul>          |

#### IV. Evaluation Criteria- 2018 MIC Area TIP Project Application, *continued*

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

Environmental and Community Impacts</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                     | Describe the project's location and potential environmental and community impacts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|                     | <p><b>I. Environmental Impacts:</b> federal agencies or entities receiving federal funds must avoid, minimize, and/or mitigate impacts of transportation projects on the natural and cultural environments. <i>Examples include air quality impacts; proximity to streams or wetlands; proximity to historic resources; promoting energy conservation.</i></p> <p><b>a. Describe Negative Impacts:</b> Refer to attached Environmental map. (<i>up to 550 characters</i>): None</p> <p><b>b. Describe Positive Impacts:</b> Refer to attached Environmental map. (<i>up to 550 characters</i>) • Improve or nullify air quality impacts</p> <ul style="list-style-type: none"> <li>• Minimize disruption or displacement of residents and jobs</li> <li>• Promote energy conservation</li> <li>• Mitigation measures</li> </ul> <p><b>II. Community Impacts:</b> federal agencies or entities receiving federal funds must identify and address disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority and low income populations. <i>Examples include potential for relocation, isolation, division or disruption to low income/minority communities; connectivity, availability and frequency of transit service between employment centers and low income/minority communities.</i></p> <p><b>a. Describe Negative Impacts:</b> Refer to attached Minority and Low Income Population maps. (<i>up to 550 characters</i>): None</p> <p><b>b. Describe Positive Impacts:</b> Refer to attached Minority and Low Income Population maps. (<i>up to 550 characters</i>)</p> <p>Maintains connectivity between the major sites for low income and minority people and employment, services, and other transportation modes</p> |

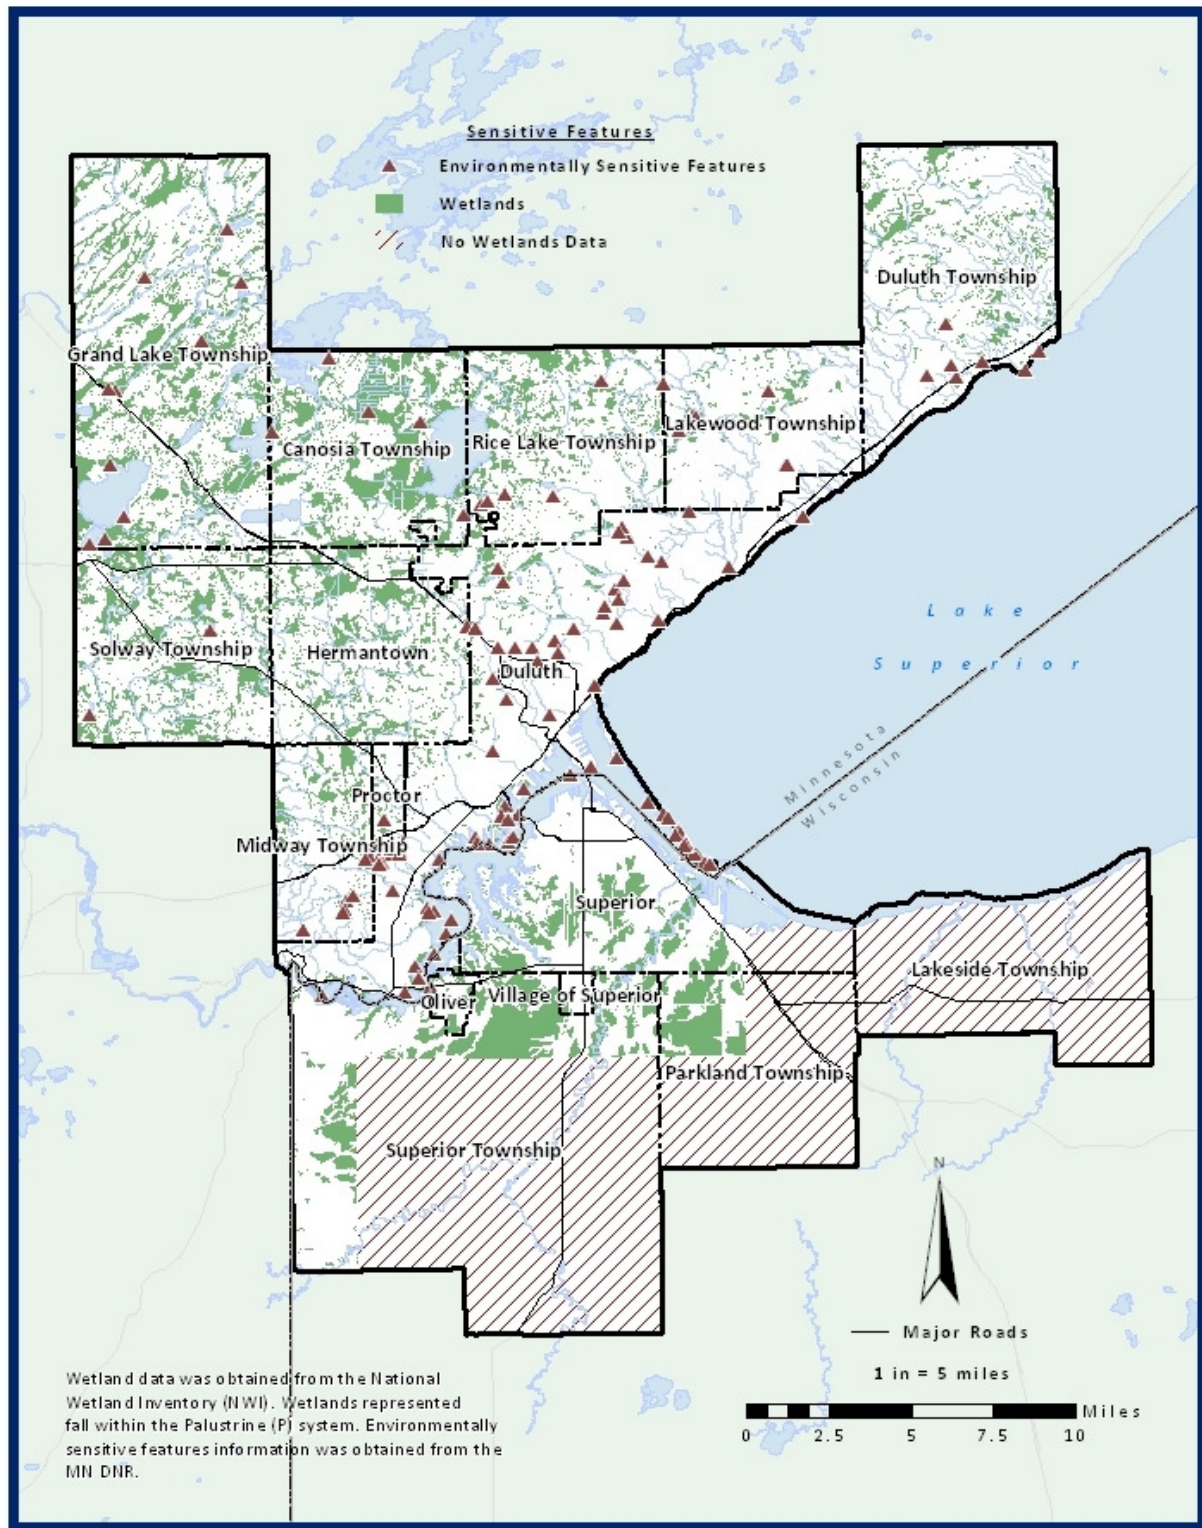

#### IV. Evaluation Criteria- 2018 MIC Area TIP Project Application, *continued*

|                     |                                                                                                                                                                         |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Evaluation Criteria | <b>F. Public Participation</b>                                                                                                                                          |
|                     | Describe what public participation or community involvement efforts have been and will be undertaken in regard to the proposed project. <i>(up to 3400 characters)</i>  |
|                     | The DTA as well as the MIC hold annual meetings to review the TIP as well as levels of service and fare levels. The DTA's monthly meetings are also open to the public. |
