10. Adjourn	

Next Meeting
 Wednesday, September 18, 2024
 Douglas County
 6:00 pm

Agenda Item Descriptions

** = Presented for Approval or Adoption*

1. INTRODUCTIONS / AGENDA REVIEW

2. COMMITTEE BUSINESS

- Meeting Summary of 6.26.24*
- MIC Director's Report

Blatnik Update and Bridge Traffic Mitigation Modeling – Hope all can attend our September meetings; we'll be having a presentation from the DOT as to status of the Blatnik, plus a more extensive discussion as to traffic mitigations efforts being planned for when there is only the Bong Bridge to move between the cities. Meetings are being conducted to put forward potential flow options/restrictions. Key will, obviously, be Belknap on the Superior side. The MIC will also document the traffic issue within the context of the Long Range Plan being modeled by our consultant, AECOM.

Bong Bridge Public Meeting – Sent last week, and just prior to the MIC Board meeting on the 21st, Wis DOT will be holding an information meeting from 5 to 7 pm at the Superior Library to detail maintenance work to be performed on the bridge next construction season – 2025. Some of the work here is being done knowing that the Bong will see an inordinate volume of traffic once the Blatnik closes in a few years. The major impact will be that traffic will be funneled down to one lane in either direction. At some stage, the ramps on the Mn side will be closed for repairs as well.

MIC Mid-Year State/Federal Review – On August 8th, we conducted our annual State and Federal review of all operations of the MIC. We go over various administrative items including financial and other reporting requirements via both states. One document we will be looking to update next year is our Memo of Understanding (MOU) that lays out the working arrangements between the MIC, the DOT and the DTA (our two main funding partners). We also reviewed the contents of the Work Program, status of each TIP and where the MTP is at in its approval stages. All items checked out and we are in good standing with the oversight agencies.

Duluth – Central Entrance Review – At the end of the month, I've arranged to meet with the MIC Board Councilors on the Duluth side, along with the Duluth Mayor's representative on the MIC Board to discuss the upcoming public review meetings on possible design of the reconstructed Central Entrance corridor – now slated for either 2028 or 2029. All should recall the extensive work that the MIC conducted that led to the current design initiative underway with MnDOT. Most important for upcoming decisions on design will be some level of adherence to the City's Small Area Plan established for the corridor and how well some chosen

* = Presented for Approval or Adoption

design fits the objectives of said City plan. Before the year is out, I'll re-present the MICs Plan on the roadway to refresh everybody as to what we stated. I should point out that, at some point in the future, the MIC Board will very likely be asked to approve added federal funds for the project targeted for actual construction.

Northern Lights Express – After talking with County Commissioner (and MIC Board member) Annie Harla, I've been invited to attend meetings of the NLX/Depot committee. City, County and St. Louis Co. Regional Rail staff convene to discuss upcoming steps in the NLX project, including possible transportation issues and changes that may occur surrounding the Depot. Will report back to the MIC as needed.

RAISE Grant – Rice Lake Road Corridor Project - St. Louis County Public Works was awarded a \$25 million Rebuilding American Infrastructure with Sustainability and Equity (RAISE) grant for the Rice Lake Road Corridor Project. At the TAC and MIC meetings last December, Vic Lund presented information about the project and we subsequently provided a letter of support for the County's grant application. The project will improve safety and traffic flow along this critical freight and passenger transportation route and will also provide regional economic development and community benefits.

Title VI and Language Access Plans – Following up on the request made at our May meeting – if you haven't done so already, please respond to the short survey we sent to determine the demographic composition of our Board and Committee members. This is so we can assess, in accordance with our Title VI and Language Access plans, who's involved in our discussions about transportation issues and planning projects as advisory committee members.

Letter(s) of Support:

- **St Louis County** – Federal Rail Administration grant program to explore the feasibility of grade separation at two locations along Midway Road (CSAH 13) immediately south of USH 2 (Adolph) and diagonal crossing at St Louis River Road. Each is exposed to approximately 30 trains per day. Delays to freight traffic along this key corridor for goods movement is becoming a concern.

- [Meeting Materials Tutorial](#)

The MIC uses its website as an official posting site for public notifications, along with our plans and studies. In an effort to streamline our meeting notices and gain more traffic on our website, we will no longer be attaching the meeting materials to the meeting notices that are emailed to our members and stakeholders each month. Instead, a link will be provided within the body of each email notification that will direct folks to each meeting's webpage on our website. Here, links will be listed for all meeting materials that can be viewed, downloaded

or printed at one’s convenience. A brief tutorial will be given at this month’s meeting to familiarize you with how this will look.

3. DRAFT 2025-2028 SUPERIOR AREA TIP – RELEASE FOR 30 DAY PUBLIC COMMENT PERIOD ON SEPTEMBER 1, 2024*

On approval, the MIC will release the 2025-2028 Superior Area TIP for public comment for a 30-day period, beginning September 1, 2024. At this time, our lists of public projects for Fiscal Years 2025-2028 should be complete for the time being, according to our input from our constituent jurisdictions. After this public comment period, any pertinent comments received will be incorporated into the final version of the TIP, with the action to adopt to be included in the agenda for the October 2024 MIC Board meeting.

**4. 2024-2027 SUPERIOR AREA TIP AMENDMENT #16*
TIP AMENDMENT #16**

A TIP amendment has been requested by WisDOT for preliminary engineering scheduled to begin in 2024 for work associated with a 90-bridge deck sealing project covering the NW Region of WisDOT with a total cost of \$35,000. The funding below is for PE work associated with the two bridges in the MIC area.

2024 Transportation Improvements Projects (Roadway)

Jurisdiction and Project Number	Project Description		Estimated Costs & Funding Sources Thousands			
			Federal	State	Local	Total
WisDOT 113-24-027	USH 53 Multiple Bridge Structures B-16-0012&16- 0024 (0.0 miles)	PE ROW CONST	.60	.15		.75
Amended to TIP in August 2024	Bridge Preventative Maintenance NHPP 1190-03-07	TOTAL	.60	.15		.75

Questions regarding this project should be directed to Sheldon Johnson at 715-635-2197 or by email at sjohnson@nwrpc.com.

Agenda Item Descriptions

** = Presented for Approval or Adoption*

5. FINAL 2025-2028 DULUTH AREA TIP*

After the Public Comment Period (July, 2024), The 2025-2028 Duluth Area TIP is ready for approval by the MIC Policy Board, to be voted on at the August MIC Policy Board meeting, after review by the TAC. The TIP will then be approved by FHWA later in the year, likely in September or October of 2024.

6. DRAFT 2025-2026 MIC WORK PROGRAM DISCUSSION

At the meeting this month, we'll cover the contents of the Work Program for 2025. The short-term section will be predominately the Safe Streets For All award (\$250K + match) that will follow-up on our current work via AECOM. We hope to get this launched during the first quarter of the year. Under our Transit element, we'll note several smaller tasks that the DTA has discussed with us that will include their planning efforts. Other modal elements, including our updated Bike and Pedestrian Plans, will likewise continue into '24. We'll note some further Metropolitan Transportation Plan work for next year (modeling) plus the usual compilation of the TIP for each state. Administrative items will include the usual, and an update of what is termed the 'Memorandum of Understanding' that denotes the tasks/responsibilities between our two main funding partners – the State DOT and Transit (DTA) – and the MPO. Full budget numbers to come next month.

7. LONG RANGE MTP 2050 PROJECT UPDATE

Every MPO is federally required to prepare and update a long-range Metropolitan Transportation Plan (MTP), the key plan of each MPO. An MTP provides the overall vision for the region's transportation system, includes goals and objectives to help meet the vision, identifies projects that can be included in future TIPs, and provides the underpinning of the MPO's work program. The MIC is required to update its long-range MTP at least once every 5 years. The next MTP update is due this October. MIC staff have been working on numerous tasks to support the MTP update for many months.

MIC staff have received review comments from and had formal consultation with federal and state oversight reviewers. A brief summary of this important review step and some key input received will be provided.

MIC Board members will receive a copy of the latest draft MTP that includes revisions following the federal and state oversight review. This will allow a final review opportunity for MIC Board members over the next few weeks prior to finalizing the MTP in September in preparation for recommending adoption in October.

Agenda Item Descriptions

** = Presented for Approval or Adoption*

A summary of the ongoing public comment period and two open houses for the draft MTP will also be provided.

8. ROUND TABLE DISCUSSION

9. PROJECT UPDATES

- **City of Duluth West Superior Street Traffic Re-routing**

The City of Duluth, towards their efforts to reconstruct West Superior Street, is considering routing options for a 3-phased detour plan for all modes of traffic. These detours are currently planned for construction during the following three years:

-2026/Phase 1: Point of Rocks to 18th Ave W

-2027/Phase 2: 18th Ave W to 24th Ave W

-2028/Phase 3: 24th Ave W to Carlton St

- **2027 & 2028 MN Carbon Reduction Program (CRP) Funds**

MnDOT is still reviewing their CRP solicitation schedule, and the main points are as follows:

1. MnDOT is working to align CRP grants', PROTECT grants', and Transportation Alternatives (TA) grants' timelines.
2. In this next round, likely this Fall, CRP and PROTECT grants will be soliciting for FY27, 28, and, 29.
3. The CRP funding will follow similar processes for eligibility as the previous two years (FY25, and 26).
4. PROTECT grants are intended to have a more streamlined solicitation process, through the ATP. This will be guided by the Resilience Improvement Plan.
5. Additional information on these programs and schedules will be available in early September, 2024, with time for questions and feedback in October, 2024.

10. ADJOURN
